

Discontinuation of replacement drives - last call for orders

To purchasing management

12.04.2024

Last opportunity to order replacement drives of geared motors, gearboxes and motors

Dear Ladies and Gentlemen

In June 2020, we informed you about the discontinuation of these series:

- GnG-gearboxes GST/GKS/GKL/GSS/GFL/GKR series
- Three-phase AC motors m550-AP IE3 / Generation A / 0.75 - 4 kW
- MD three-phase AC motors / IE1 / 0.06 - 45 kW
- MH three-phase AC motors / IE2 / 0.75 - 45 kW

Since July 2021, these drives have only been available as replacement drives, as we are obliged to do so for three-phase AC motors by the applicable EU Regulation **(EU) 2019/1781 on the Ecodesign Directive 2009/125/EC**.

With this letter, we hereby inform you that there is the possibility of a **final order for these expiring series until June 30, 2024**. Deliveries can be scheduled until April 2025.

In order to be able to stock up on complete replacement drives if necessary, we are happy to offer you this option as part of a partnership.

Beyond April 2025, repair services can continue to be carried out for these products, depending on the availability of parts and components.

Our current motor and geared motor series are of course still available as replacement drives for these series. Please check the installation options and technical data in advance as they are not structurally and technically fully compatible!

Yours sincerely

Lenze Vertrieb GmbH
